---

## Projects

### Bubble Sort Visualizer

*Oct 2020*

- Created a bubble sort algorithm visualizer using React.

### Personal Website

*Sep 2020*

- Created my own personal profile website using HTML and CSS.

### Guess Recipe Origin (Spring 2019) – Java, MapReduce

- Used text mining and a Naïve Bayes classifier to determine the origin of a recipe based on its ingredients.

- Used MapReduce to quickly process large datasets.

- The program was able to guess the correct country of origin 70% of the time out of 20 different countries in the dataset.

### Point of Sale System (Fall 2019) – HTML, CSS, JavaScript

- Created a web-based Point of Sale system that simulates an in-person transaction.

- Designed and wrote the user interface.

- Created the checkout page that simulates the payment process that generates a receipt.

---

## Work Experience

### KOgent Systems – Full Stack Developer Intern

*Jan 2020 – Apr 2020*

- Created an internal website that helps employees and managers track their work hours, update employee information, and view/create reports.

- Worked in a team-oriented environment.

- Technologies used: Angular, TypeScript, Java, HTML, CSS, DataGrip, IntelliJ, Swagger UI, Jira, Git.

### EL-AL Airlines – Passenger Service Agent

*Oct 2013 – Oct 2015*

- Responsible for passenger check-in to their scheduled flight.

- Verifying the validity of flight documents such as passports and visas.

- Making sure the flight leaves at the scheduled time of departure.

---

## Awards

- Outstanding Graduate.

*May 2020*

- Recipient of the Robert Kyncl and Luz Avila Kyncl scholarship.

*Aug 2018 – May 2020*

- Grace Hopper Scholar.

*2019*
